

Architectural Design

Updated Study Material

Course Overview

Architectural Design focuses on planning and designing buildings considering function, aesthetics, safety, and sustainability.

Chapter 1: Basics of Architectural Design

It includes space planning, building orientation, and basic design principles.

Example: Layout planning for a residential house.

Chapter 2: Design Principles

Key principles include balance, proportion, rhythm, and harmony.

Example: Balanced façade design.

Chapter 3: Building Drawings

Common drawings are plans, elevations, sections, and site plans.

Practice Questions

1. What is architectural design?
2. Name any two architectural drawings.
